PREFACE

The Central Statistical Organisation (CSO) has been conducting economic censuses and follow-up surveys periodically since 1977 with a view to filling data gaps in the unorganised sectors of non-agricultural economy. The Directory Manufacturing Establishments (DME) Survey, 1984-85 was the fourth in the series of follow-up surveys and second on the basis of frame thrown by the second economic census conducted in 1980. The survey covered all directory establishments (i.e. enterprises engaging at least six workers including at least one hired worker) engaged in manufacture and repairing services which were not registered under section 2m (i) and 2m (ii) of the Factories Act, 1948.

2. A report based on summary results of the DME Survey, 1984-85 was brought out by CSO in March, 1989. This report provided data on important characteristics viz. employment, emoluments, fixed assets, working capital, outstanding loan, input, output etc. by industry groups at all-India level separately for rural, urban and combined sectors. The above characteristics were provided by major industry groups at State level by combining the rural and urban sectors.

3. The present report provides details of each of the important characteristics covered in the summary results, by major industry group at all-India level separately for rural, urban and combined sectors. These details are also given for principal states for the combined sector.

4. It is hoped that the information contained in this report would be found useful by all concerned with development planning of the unorganised manufacturing sector.

5. The field work of survey was carried out by the special staff provided to the Field Operations Division of the National Sample Survey Organisation. The processing of data was undertaken at the Computer Centre, Department of Statistics. The report has been prepared in the Economic Census and Surveys Division of CSO.

INTRODUCTION

1. The Central Statistical Organisation (CSO) has been making concerted efforts to fill up data gaps in the unorganised sectors of non-agricultural economy by undertaking economic censuses and follow-up surveys. The first economic census covering non-agricultural establishments (i.e. enterprise employing at least one hired worker on a fairly regular basis) was carried out in 1977. Based on the frame thrown by this economic census two follow-up surveys one in 1978-79 covering the sector of unorganised manufacturing and second in 1979-80 covering the sectors of trade, transport, hotels & restaurants, storage & warehousing and services were conducted.
2. The second economic census was carried out in 1980 along with the houselisting operations of 1981 population census. This covered establishments as well as own-account enterprises in the non-agricultural and agricultural sector excluding enterprises engaged in crop production and plantation. On the basis of frame thrown by this census an enterprise survey was undertaken in 1983-84. This was followed by a survey on unregistered manufacturing in 1984-85 and a survey on wholesale and retail trade in 1985-86.
3. The survey on unregistered manufacturing was undertaken as a twin programme. Under the first programme, the survey of non-directory establishments along with the own-account enterprises in unregistered manufacturing sector was conducted as a part of the 40th round of NSS (July 1984—June 1985) and the survey of directory manufacturing establishments (DME) was conducted under the second programme during October 1984—September 1985. The field work of the survey was carried out by National Sample Survey Organisation, Field Operations Division and the data processing by the Computer Centre of the Department of Statistics.
4. The Directory Manufacturing Establishment Survey, 1984-85 covered establishments employing at least one hired worker on a fairly regular basis and having a total of six and more workers. The survey included Directory Manufacturing Establishments engaged in manufacture and repair services which are not registered as factories under section 2m(i) and 2m(ii) of the Factory Act of India 1948. Establishments engaged in manufacture of Bidi and Cigar other than those covered in ASI were also covered irrespective of whether these establishments were registered or not under Bidi and Cigars Act. In terms of geographical coverage the survey covered the whole of Indian Union excepting Ladakh and Kargil districts of Jammu & Kashmir and rural areas of Nagaland.
5. The main schedule 2.2A on Directory Manufacturing Establishments was canvassed and information was collected on description of activity, details of employment and emoluments, inventory of fixed assets and working capital, outstanding loan, quantity and value of raw materials, quantity and value of products and by-products manufactured. A facsimile of the schedule 2.2A is given at Annex-I.
6. A report giving the summary results of the data collected in the directory manufacturing establishments survey 1984-85 was brought out by CSO in March, 1989. The report provided information on important characteristics viz employment, emoluments, fixed assets, working capital, outstanding loan, input, output etc. by type of industry group at all-India level separately for rural, urban and combined sectors and state level for the combined sector by major industry group.
7. The present report provides details of each of the important characteristics for major industry groups (two digit level of NIC) at all-India level separately for rural, urban and combined sectors. These details are also given for 16 principal states (Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Jammu & Kashmir, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Orissa, Punjab, Rajasthan, Tamil Nadu, Uttar Pradesh and West Bengal) and union territory of Delhi for the combined sector only. These 17 states/UTs account for over 96 percent share in respect of all characteristics covered in the report. It has not been possible to give these results at three digit level of NIC due to small sample size for different industry groups.
8. It may be indicated that for some of the industry groups at two digit level and for some of the states/UTs the number of sample directory establishments were small (details in Annex 2 and 3) and as such the estimates given in the report may be used with caution.

Concepts and Definitions

Reference year : For the Directory Manufacturing Survey (October 1984—September 1985), the reference year related to the accounting year preceding the date of survey for those who maintained books of accounts and last year (365 days) for those who did not maintain accounts.

Enterprise : An enterprise is an undertaking engaged in production of some goods and/or services by the members of a household and/or by hiring outside labour.

Establishment : Enterprise having at least one hired worker on a fairly regular basis are called establishments.

Directory Establishments : By 'directory establishment' was meant an establishment which had six or more persons (including both household and hired). On the other hand, an establishment which had less than six workers was termed a non-directory establishment.

Persons employed : It refers to all workers engaged in work connected directly or indirectly with the manufacturing process, and all administrative, supervisory, managerial, technical and clerical staff, as also, labour engaged in production of capital assets for establishment's own use. It also includes employees in the so-called sales department, as well as, those engaged in purchase of raw materials, fixed assets, etc. for the establishment. The proprietors and partners and their unpaid family members who work in or outside the establishment and also persons in the head office connected with the manufacturing activity of the establishment are also included in the items.

Total emoluments : Total emoluments include salaries and wages paid during the year, to all persons in the employment of the establishment. It includes bonus, ex-gratia payments, value of benefits in kind, in respect of supplies made or services rendered, such as, housing medical education and recreational facilities. Employer's contribution to provident fund, pension, gratuity or similar other charges are, however, excluded.

Fixed assets : Fixed assets include assets of the establishment such as land, building, machinery, transport and other equipments, new or used, that have a normal economic life of more than one year from the date of purchase regardless of their use—whether for production, transportation living or recreational facilities to labour engaged. The value of assets whether fully paid or not owned by the establishment is determined on the basis of money value the assets can fetch in the present condition.

Components of fixed assets

- (i) **Land :** Land means the land on which the establishment is accommodated together with the surrounding area which is used for the enterprises.
- (ii) **Building :** This includes shed, structure, house and also building under construction as well as part of a house or structure and conveniences that facilitate the housing of the establishment.
- (iii) **Plant and Machinery :** This includes all types of implements and machinery used in the activity of the establishment.
- (iv) **Transport Equipment :** This includes those equipments which are used for transporting goods of the establishment such as trucks, trailers, cars, cycles etc.
- (v) **Tools and other fixed assets :** This includes small loose tools having normal life of more than one year and other fixed assets like furniture, fixtures, fans etc.

Working capital Working capital has two parts—one physical and other financial. Physical part of the working capital includes raw materials, stores, fuel, lubricants, semi-finished products, finished products and by-products. Financial part comprises cash in hand and at bank, and net balance of amounts receivable and payable.

Outstanding loan Outstanding loans represent all loans, whether short-term, whether interest bearing or not which remains unpaid on the closing day of the accounting year.

Total input The value of raw material, electricity, fuel, lubricants and other auxiliary material consumed, and services purchased, maintenance and other expenses incurred by the establishment for production purposes are considered as total input.

Total output : Total output comprises the value of products and by-products manufactured by the establishment together with the value of industrial servicing rendered to other concerns and other receipts incidental to entrepreneurial activity.

Depreciation : Depreciation represents the allowance provided to take account of the wear and tear and/or obsolescence of the value of fixed assets for the accounting year.
